PROJECTS

Healthcare Monitoring system — IoT

IoT is revolutionizing the healthcare industry by enabling remote health monitoring and save the files in cloud.

Virtual Home creation — VIRTUAL REALITY

Its involves using virtual reality technology to simulate and design residential spaces. Users can immerse themselves in a digital environment, where they can visualize and interact with different elements such as furniture, decor, and architectural features.

E - Commerce Website— HTML, CSS, JAVA SCRIPT

The e-commerce website was developed to provide a complete online shopping experience for users, allowing them to browse products, add items to their cart, and make secure purchases. The website features user authentication, a product search/filtering system, and an integrated payment gateway.
